					12	11
					13 <b>21</b>	12 <b>15</b>

- Take out the cards which you see in the left column
- You now have to lay the cards down in PAIRS to make the totals on the right hand side.
- In the first example, you will take out the Ace, the 5, the 7, the 10, the Jack and the Queen.
- I think the answer for the first example will be 5 + 7, Ace + Queen, 10 + Jack.
